DETAILED ACTION

Response to Amendment

The amended and new claims contained in Paper No. 5 have been acknowledged and response to these claims is contained within the body of the rejection.

New claims ³/~~2~~6-43 have been allowed.

Claim 44 has been withdrawn as being directed to a non-elected invention. Claim 44 recites the method step of "re-constraining" which was not claimed in the original presentation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Fischell et al (USPN 5,743,874).

The claims as amended still broadly read on Fischell et al.

Claim 1, with respect to a delivery system comprising, a catheter (10), an inflatable device (50), a slidable outer tube (20), a self-expanding stent (60), radiopaque marker bands (180,182), a fluid port (33), a tapered distal tip (21), a fluid lumen (34), guidewire lumen (43), and stent containment cavity (70), see Figs. 1-4 of Fischell et al. With regards to marker bands, Fischell does disclose, "one, two, or more radiopaque markers could be used with any integrated design", col. 5, line 28+.

Art Unit: 3738

Claim 17, with respect to method for implantation of a self-expanding stent, Fischell et al discloses (col. 3, lines 32-60) methods of use for delivery system comprising of delivering the device, implanting stent, inflating balloon, use of guidewire, providing axial movement between tubular member and outer member, retracting device, inflating balloon, deflating balloon, and withdrawing delivery system from patient. With regards to balloon's position relative to the stent, Fischell et al does disclose an inflatable device provided on the catheter and positioned at least below the distal portion of the self-expanding stent, see col. 3, lines 64+.

The new claims 29- 35, broadly read on Fischell et al.

Claim 29, with respect to self-expanding stent and delivery system comprising a self-expanding stent (60), catheter (10) having distal end and configured to retain stent, and an inflatable device (50) overlapping with at least a portion of the stent (60) see Figs. 1-4 of Fischell and col. 3, lines 64+.

Allowable Subject Matter

Claims 5,6 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 36-43 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
